BROKE HIS LEG IN

If within the next week or more the residents of the city notice one or more men investigating trees around their backyards or anywhere else on their premises, they may conclude that the investigators are some of the party that is here now under H. B. Kirk from the Connecticut Agricultural Experiment station in their research here for traces of the brown tail moth. Mr. Kirk with his three assistants have already covered a considerable section of the city working northward from the water front, but without finding any brown tail moth clusters yet.

The search in Norwich is part of the plan of State Entomologist Dr. W. E. Britton, to cover this end of the state to avert if possible any lodgment of this destructive pest which is doing such incalculable damage in Massachusetts and has been found to be spreading to this state, as nests of the moth have been found in Putnam, Woodstock, Jewett City and Stonington.

Helpers from Putnam. On Pear Trees in Jewett City.

The men whom Mr. Kirk has with The men whom Mr. Kirk has with him are three from Putnam who gained their experience with the pest there. They are H. A. Howarth, E. R. Sherman and A. J. Hibeault. With these helpers Mr. Kirk expects to spend about two weeks in this territory. The about two weeks in this territory. The outlying towns are to be covered. In one characteristic of the brown tail moth lies a habit which limits somewhat the field in which a search for it is to be made. It is night flying insect and is attracted by the lights of cities or communities so that only in such places is it necessary to look for traces of it. The dark country possesses no attractions for it and its spread is always located first by finding the nests in the trees in city yards or streets.

Nests Found on Topmost Twigs.

This is the time of the year when the spread of the insects can be detected because the leaves are off the trees and the small sliky white nests can be seen on the topmost twigs of the trees. Each nest contains from 200 to 500 caterpillars, a sixteenth of

a birthday party last night, when Charles Macdonald Brown of 124 Lin-coln place gathered with his wife and When you feel that your liver and bowels need help, take Dr. Edwards' Olive Tablets. Substitute for Calomel. Calomel is effective, but dangerous—causing bad after-effects.

Olive Tablets are especially made to take the place of Calomel. Dr. Edwards for years has been Calomel. Dr. Edwards for years has been Calomels foe. He saw its dangers and its disadvantages in 17 years' practice, treating patients for all kinds of liver and bowel complaints. In his efforts to do without Calomel he developed his now fameus little olive-oil-colored tablets. Olive Tablets are mild but effective. Safe and sure. Pleasant to take but unfailing in results.

Olive Tablets oil the bowels just enough to start Nature's own action, and they tone up the liver at the same time. They are made from a rare combination of vegetable compounds mixed with olive oil.

If you want to regain that feeling of joyous buoyancy and clear thought, take Dr. Edwards Olive Tablets. They work like a vacation. 10 and 25 cents per hox.
